

MINIMALIFE

MINIMALIFE is the collaborative work by Misha Antonov and Mirko Perencevic.

The band translates the sounds of electronic music into a live band context, bringing together the best of both worlds. By using live instrumentation along with analog and digital equipment MINIMALIFE creates a distinctive sound marked by a clear and organic architecture.

The joy of improvisation and playing live is the key element that mesmerises listeners and makes them dive into a deep and delightful experience.
